

Dear Committee,

Whoever authored and sponsored this bill should be impeached immediately. They are flat out STUPID. I thought CT had educated leaders but I guess they missed the memo. Microstamping is a farce and does nothing to prevent violence.

Are CT legislators capable of making their own laws or do they rely on other states to make them for them? California has this and it has done nothing to curb violence. It is an expensive and not even available on most guns. This is an outright effect ban on any handgun and will be challenge in court as it already is in California and will be ruled in the people's favor. What a joke criminals use stolen or 3D printed guns that would side step this by so far. Are you really wasting my tax money on this stupid bill?

Body armor? What a scam are you FN serious? So all the body armor that was created in backpacks for safety of people looking to be educated both young and adults now they become criminals? These ghetto criminals in ct don't even carry a holster for their guns, pants falling while shooting and you are worried one of them will be wearing 40lbs of body armor? Please tell me you are not taking this bill seriously? The author of it should be literally thrown out of office for stupidity.

This bill is probably one of the worst and most stupid ones ive ever heard of. Body armor in ct is already regulated can only be bought in person and by someone with out a felony. 100% of the body armor owners in ct or those looking to purchase keep in house in the event that something goes down. I go to the range often and not once have I seen someone wearing or practicing in it. You have seriously got to be kidding me with this bill! Stop wasting every tax payer dollar on nonsense and do things that matter.
